About Me

Hello! I'm Echo, a developer, electronics enthusiast, and creative content creator passionate about building practical and innovative solutions.

I have experience in software development, embedded systems, databases, and electronics projects such as management systems, IoT devices, robotics, and trading tools. I enjoy turning ideas into functional and useful systems.

I hold a Mechatronics Servicing NC II certification from Technical Education and Skills Development Authority, which strengthened my skills in electronics, mechanical systems, and Automation.

Alongside development work, I also offer video editing, photo editing, graphic design, and printing services for students, creators, and small businesses. I focus on creating clean, effective, and engaging digital content.

Skills Section
